

Intelligent Software for Smarter Underwriting, Claims & Risk Management

A Native AI-Powered SaaS Platform Unifying the Insurance Lifecycle Management

Multiple Systems, One Blur

Dribbling between multiple disconnected systems just to get an accurate view of your insurance pool? When your foundational platforms do not talk to each other, they cannot deliver a single version of truth.

This forces your team to constantly swivel their chairs, manage fragmented paperwork, and work twice as hard to get one thing done right.

See klear

Klear.ai delivers a unified, fully integrated core, platform to seamlessly manage your policy and claims administration, loss control, and dynamic reporting within one intelligent system.

Supported by native machine learning at the core, Klear.ai automates routine back-office workflows, freeing your staff to focus on member support rather than tedious data entry.

**Why Enterprise Insurance
Leaders Choose Klear.ai:**

Unified Platform • Quantum Productivity Improvement
Better Member Experience • Happier Employee

Unified Core Engine Platform with Native AI

Klear.ai provides innovative, insurance data solutions bringing a SaaS-based, full-lifecycle approach to modern risk management. By leveraging predictive analytics and advanced workflow automation, we turn raw insurance data into immediate actionable insights.

Core Application Pillars

Policy Administration	Claims Management	Loss Control	Insured Member Self-Service Portal	Robust Predictive Analytics
Execute underwriting and policy management with modern no-code tooling, controlling your future and accelerating speed to market.	Experience fewer clicks, faster claim resolutions, and stronger operational controls. Includes fully integrated workflows tailored to streamline complex P&L; Workers' Compensation and Professional lines of business workflow.	Automatically turn potential risk data into robust, proactive prevention strategies, uncovering operational blind spots before they escalate into high-exposure losses.	Empowers your pool members to securely access coverage details and self-serve policy needs, manage documentation, FNOL/-FROI claim reporting and receive updates instantly, eliminating manual support phone calls and emails.	Effortlessly trace loss trends, pinpoint hidden exposure vectors, and identify early reserve indicators quickly enough to proactively mitigate risk.

Quantifiable Business Impact & ROI

Native AI-driven automation significantly redefines core operational margins, granting claims adjusters and pool risk managers unprecedented productivity gains:

Operational Benefit Metric	Average Business Impact / ROI
Lower Loss Adjustment Expense (LAE)	15% - 25% total expense savings
Increased Claim Adjuster Productivity	2x - 4x operational capacity improvement
Higher Policy & Underwriting Accuracy	90%+ reduction in manual processing errors
Loss Control	Reduce preventable loss frequency by 20%-30%.
Reduced Premium Leakage	10% - 20% aggregate reduction

Experience the Power of Native AI. Schedule a Demo Today.

Transform your insurance operations from a manual blur into an automated system of truth. Contact our advisory team for a customized, no-obligation system demonstration tailored specifically to your organization's workflows.
